

TimeManagement Corporation Announces Successful Implementation at Lone Star Texas Grill

INTEGRATED LABOR MANAGEMENT SYSTEM

timing is everything...

FOR IMMEDIATE RELEASE

TMx Labor Management Software to Support Integrated Approach to Labor Planning

MINNEAPOLIS—April 20, 2009—TimeManagement Corporation, a labor management solution provider, today announced that Lone Star Texas Grill has installed its labor management system. Canadian-owned and operated since 1986, Lone Star Texas Grill is Canada's only authentic Texas restaurant. Known for its "down-home cooking," Lone Star operates 14 sites that serve steaks, ribs and award-winning fajitas.

According to Lone Star's Senior Project Manager Bob Macey, the goal of the project was to implement a simple yet robust work force management system. "From time capture to demand planning, we wanted to provide our operators with an integrated approach to labor planning," he explains. "TMx is everything we hoped for—and the process with TimeManagement was fast and efficient from installation right on through to production."

The TMx solution integrates seamlessly with Lone Star's existing ADP payroll system. "We believe the integration will dramatically reduce payroll errors encountered during on-boarding and pay processing," Macey says. In addition, Macey says the regulation of "punches" against a schedule has cut out late starts and early exits. Further, forecasts are easy to understand and use so managers are better able to judge the fluctuations in business.

TimeManagement Corporation (www.timemgmt.com) offers labor management solutions that assist over 5,500 hospitality operators by improving the efficiency and productivity of their workforce. TMx labor management solutions include performance-based scheduling, dynamic labor forecasting, embedded workflow for employee onboarding, multiple time capture solutions and seamless integration to numerous POS, PMS and payroll systems.
